

Healthcare and Emergency Information

If for any reason during the camp session your emergency contact information should change, please contact us immediately.

Prescription/Non-Prescription Medication

Medication time schedules should be set so that when possible, medication is taken at home rather than at camp. However, if medication must be taken at camp, the following procedures apply:

- **Epi-Pens** – the parent/legal guardian must complete an [authorization and instruction form](#).
- **Asthma** – the parent/legal guardian must submit an **Asthma Action Plan** from child's doctor and complete an [authorization and instruction form](#).
- **Prescription Medication** – The parent/legal guardian and physician must complete an [authorization and instruction form](#). The completed form must accompany the medication, so be sure to take this form to your physician whenever your child is ill.
- The medicine, in the original container (along with authorization form), must be given to the camp director. The parent/guardian should take the medication to camp; however, if this is not possible, your child should be instructed to take the medication and the authorization form directly to the camp director. Under no circumstances should medication be shown or shared with other campers.
- At the designated time, the camper will go to the office to take the medication. Assistance/supervision will be in accordance with the instructions on the authorization form. Medication is a parental responsibility; camp employees will not assume any liability for supervising or assisting in the administration of medication.
- Emergency medications, such as an epi-pen, and the authorization form will be placed in the care of the primary first-aider and will remain in close proximity to the camper. At the end of each camp day, emergency medication will be sent home with the parent. We do not keep medicine overnight.

Healthcare and Emergency Information cont'd

Camper Illness

Sick campers must not be sent to camp. When a camper becomes ill at camp, the parent must arrange for the camper to be taken home as soon as possible after being notified of the illness.

Camp Dynamite staff will provide comfort until the child is picked up by their parent or guardian. Comfort will include providing a place of rest and, if needed, hydration until the parent arrives.

Return to Camp Policy

To ensure the health of all staff and campers, Camp Dynamite has adopted the following guidelines for returning to camp after an illness:

- Staff or campers may return to work or camp once their fever has been gone for 24 hours without medication.
- Staff or campers may return to camp when obvious signs of illness are no longer present.
